3 Your personality

Virgo rising

Virgo rising gives a precise, analytical and helpful nature. Mercury rules your chart, and is exalted in this sign, so details, systems and useful skills come easily. You improve whatever you touch; the challenge is self-criticism and worry.

Virgo (Kanya) is an earth sign ruled by Mercury, which is both exalted and at home here. Its symbol is a maiden holding grain and a lamp, standing for purity, skill and service. In a Vedic chart, Virgo describes work, health, daily routines and the drive to improve things.

Venus is debilitated in Virgo, showing a sign that values usefulness over indulgence. People with Virgo as their Moon sign or rising sign are usually analytical, practical and helpful, with an eye for detail. Their challenge is perfectionism and worry.

Your strengths

- Analytical and precise
- Hard-working and reliable
- Helpful and service-minded
- Practical problem-solver
- Health- and detail-conscious

What to work on

- Perfectionism
- Self-criticism and worry
- Over-analysing
- Being critical of others

Work and career

Virgo excels in work that needs accuracy and skill: accounting, data analysis, research, medicine, nutrition, editing, IT and quality control. They are the people who make systems work. Chaotic environments without standards frustrate them.

Love and relationships

Virgo shows love through practical care: fixing, organising, remembering. They are loyal and modest, and want a partner who values sincerity. Relaxing their standards and expressing feelings openly makes love easier.

Health

Virgo traditionally rules the intestines and digestive system. Digestive sensitivity, nervous stomach and stress-related problems are the classic weak points; regular meals and relaxation matter more for Virgo than most.

Moon in Aquarius

An Aquarius Moon processes feelings through ideas and needs space to breathe. You are friendly, fair-minded and drawn to causes, but may feel detached from your own emotions. Time with like-minded people helps you feel understood.

Mind and emotions

With the Moon in Aquarius your mind is original, detached and humanitarian. You think about the bigger picture, value friendship and freedom, and process emotions through ideas.

Home and mother

You like a home that respects independence and welcomes friends. Your relationship with your mother may be friendly but unusual, and community can feel like family.

Peace and balance

Peace comes from causes you believe in, learning and like-minded friends. Your challenge is emotional distance; sharing feelings directly, not just opinions, deepens your relationships.

Born under Shatabhisha

Independent, secretive and healing, drawn to science, research or medicine. You often see what others overlook. Its deity: Varuna (cosmic waters).

Your nature

Shatabhisha, the 'hundred healers', gives an independent, scientific and private mind. You are a natural problem-solver and healer.

Career and money

Medicine, research, technology, astronomy, astrology and alternative healing suit you.

Relationships and health

You value solitude and need space in relationships. Look after your circulation and legs.

You were born in pada 4 of this nakshatra, whose traditional name letter is सू (Su).

4 The nine planets in your chart

Each planet's house is counted from your rising sign (whole-sign houses).

Sun Surya

in Cancer · 11th house

The Sun in Cancer gives a caring, protective nature and a strong attachment to home and family. Your confidence grows with emotional security, and you lead by nurturing others.

The Sun in the 11th house brings gains, influential friends and the fulfilment of ambitions. Income rises with your standing, and networks help you. Choose friends who share your values rather than those who flatter you.

Sun is in Ashlesha nakshatra, pada 4. That nakshatra is ruled by Mercury, which sits in your 11th house, so Mercury's condition also colours how Sun works for you. It shares its sign with Mercury, so their influences blend in this part of your chart. It receives the aspect of Saturn, which adds their influence to it. It rules your 12th house (expenses, foreign lands, rest and spiritual life), so its strength shapes those areas of life. Its influence peaks in the Sun mahadasha, Jan 2074 – Jan 2080.

Moon Chandra

in Aquarius · 6th house

The Moon in Aquarius gives a detached, original and humanitarian mind. Friendships and causes matter; share your feelings rather than only your ideas.

The Moon in the 6th house can make the mind anxious and sensitive to stress, with health linked to emotions. It favours service, nursing, care work and solving other people's problems. Routine and calm habits protect you.

Moon is in Shatabhisha nakshatra, pada 4. That nakshatra is ruled by Rahu, which sits in your 4th house, so Rahu's condition also colours how Moon works for you. It receives the aspect of Jupiter, Venus and Ketu, which adds their influence to it. It rules your 11th house (gains, income, friends and ambitions), so its strength shapes those areas of life. Its influence peaks in the Moon mahadasha, Jan 2080 – Jan 2090.

Mars Mangal

in Taurus · 9th house

Mars in Taurus gives steady, determined energy aimed at building wealth and property. You are slow to anger but stubborn once roused.

Mars in the 9th house gives strong convictions and the energy to fight for beliefs. You may travel far or lead in religious or educational causes. Disagreements with teachers or father are possible; respect differing views.

Mars is in Rohini nakshatra, pada 3. That nakshatra is ruled by Moon, which sits in your 6th house, so Moon's condition also colours how Mars works for you. It rules your 3rd house and 8th house (courage, siblings and short journeys; change, research, joint money and hidden matters), so its strength shapes those areas of life. Its influence peaks in the Mars mahadasha, Jan 2090 – Jan 2097.

Mercury Budh

in Cancer · 11th house

Mercury in Cancer gives thinking coloured by feeling, with a good memory and imagination. You communicate with empathy.

Mercury in the 11th house brings gains through trade, networking, friends and smart ideas. You have many acquaintances and know how to make connections pay. A good position for business income.

Mercury is in Pushya nakshatra, pada 3. That nakshatra is ruled by Saturn, which sits in your 5th house, so Saturn's condition also colours how Mercury works for you. It shares its sign with Sun, so their influences blend in this part of your chart. It receives the aspect of Saturn, which adds their influence to it. It rules your 1st house and 10th house (self, health and direction; career, status and public life), so its strength shapes those areas of life. Its influence peaks in the Mercury mahadasha, Jan 2030 – Jan 2047.

Jupiter Guru

in Leo · 12th house

Jupiter in Leo gives dignified, generous leadership and earns respect. Good for government, education and mentoring.

Jupiter in the 12th house gives a spiritual, charitable nature and interest in moksha, foreign lands and service in institutions. Expenses on good causes are likely. Your faith protects you in difficult times.

Jupiter is in Purva Phalguni nakshatra, pada 4. That nakshatra is ruled by Venus, which sits in your 12th house, so Venus's condition also colours how Jupiter works for you. It shares its sign with Venus, so their influences blend in this part of your chart. It receives the aspect of Moon, Mars and Rahu, which adds their influence to it. It rules your 4th house and 7th house (home, mother, property and vehicles; marriage, partners and business dealings), so its strength shapes those areas of life. Its mahadasha ran Jan 1995 – Jan 2011.

Venus Shukra

in Leo · 12th house

Venus in Leo makes you warm, generous and dramatic in love, with a taste for luxury, creativity and admiration.

Venus in the 12th house, where it is traditionally strong, gives comfort, good sleep, pleasures and devotion. Spending on travel and luxuries is likely, and foreign connections can bring love or wealth.

Venus is in Purva Phalguni nakshatra, pada 1. That nakshatra is ruled by Venus, which sits in your 12th house, so Venus's condition also colours how Venus works for you. It shares its sign with Jupiter, so their influences blend in this part of your chart. It receives the aspect of Moon, Mars and Rahu, which adds their influence to it. It rules your 2nd house and 9th house (money, family and speech; luck, father, teachers, faith and long journeys), so its strength shapes those areas of life. Its influence peaks in the Venus mahadasha, Jan 2054 – Jan 2074.

Saturn Shani

in Capricorn · 5th house · Own sign · Retrograde

Saturn in its own sign Capricorn gives ambition, discipline and organising power, with a steady rise through persistent work.

Saturn in the 5th house gives a serious, practical intellect and success through disciplined study. Children may come late or ask for responsibility. Avoid speculation; slow, careful investments work better.

Saturn is in Shravana nakshatra, pada 4. That nakshatra is ruled by Moon, which sits in your 6th house, so Moon's condition also colours how Saturn works for you. It receives the aspect of Sun and Mercury, which adds their influence to it. It is retrograde, so its results tend to come in a more inward way, often after a delay or a second attempt. It rules your 5th house and 6th house (children, studies, romance and creativity; work routine, service, health and rivals), so its strength shapes those areas of life. Its influence peaks in the Saturn mahadasha, Jan 2011 – Jan 2030.

Rahu Rahu

in Sagittarius · 4th house

Rahu in Sagittarius brings unconventional beliefs and a search for meaning; foreign travel and learning bring growth.

Rahu in the 4th house can unsettle home life or bring moves, foreign residence and unusual property matters. Inner peace may feel elusive. Grounding practices and simple routines help.

Rahu is in Mula nakshatra, pada 2. That nakshatra is ruled by Ketu, which sits in your 10th house, so Ketu's condition also colours how Rahu works for you. It receives the aspect of Mars, Jupiter and Ketu, which adds their influence to it. As a shadow planet it rules no sign of its own; it acts through the lord of the sign it occupies, Jupiter. Its mahadasha ran Aug 1992 – Jan 1995.

Ketu Ketu

in Gemini · 10th house

Ketu in Gemini makes your thinking intuitive rather than logical; you prefer depth of study to small talk.

Ketu in the 10th house can bring unusual or changing careers and a detached attitude to status. Technical, research or spiritual work suits you. Success comes when work has meaning.

Ketu is in Mrigashira nakshatra, pada 4. That nakshatra is ruled by Mars, which sits in your 9th house, so Mars's condition also colours how Ketu works for you. It receives the aspect of Rahu, which adds their influence to it. As a shadow planet it rules no sign of its own; it acts through the lord of the sign it occupies, Mercury. Its influence peaks in the Ketu mahadasha, Jan 2047 – Jan 2054.

7 Shodashvarga: all sixteen charts

Parashara describes sixteen divisional charts, the Shodashvarga. Each one divides every sign into smaller parts, has its own ascendant, and is read for one area of life. A planet in its own or exaltation sign in a chart supports that area; a debilitated one asks for more effort there. The birth chart (D1), Navamsa (D9) and Dashamsa (D10) are read in detail elsewhere in this report.

The finer charts (D16 onwards) change with a few minutes of birth time, so rely on them only if your birth time is accurate to the minute.

Bhava Chalit chart

Your birth chart gives each sign one whole house. The Bhava Chalit chart measures the twelve houses from the exact degree of your ascendant instead (the Sripati method), so a planet close to the edge of a house can move into the neighbouring one. Astrologers read a planet's sign and strength from the birth chart, and the house whose results it gives from the Chalit chart.

Chalit chart

How to read it

Each house begins halfway between its middle and the middle of the house before it. The middle of the 1st house is your exact ascendant and the middle of the 10th is the midheaven, the point of the zodiac overhead at your birth.

ASCENDANT

Vir 26° 45'

MIDHEAVEN (MC)

Gem 26° 20'

The twelve houses (bhavas)

Planets that change house

Rahu is in the 4th house of the birth chart but in the 3rd house of the Chalit chart. It keeps the nature of its sign, but gives much of its results through the 3rd house: courage, siblings and short journeys.

Ketu is in the 10th house of the birth chart but in the 9th house of the Chalit chart. It keeps the nature of its sign, but gives much of its results through the 9th house: luck, father, teachers, faith and long journeys.

Varshphal: your 35th year

Varshphal (the 'fruit of the year') is the Tajika annual chart, cast for the moment each year when the Sun returns to its exact position at your birth. It is read alongside your birth chart: the birth chart shows what is promised, the annual chart shows which of it comes forward this year.

ANNUAL ASCENDANT (VARSHA
LAGNA)

Gemini

MUNTHA

Cancer, 2nd house

Cast for your birthplace. Astrologers who use your place of residence for the year may find small differences in the annual ascendant.

Muntha: the year's direction

Muntha starts at your birth ascendant and moves one sign every year. Its house in the annual chart sets the tone of the year.

Muntha in the 2nd house: gains in money and happiness in the family; your speech carries weight and savings can grow.

The Muntha sign is ruled by Moon, placed in the 4th house of the annual chart in Virgo; its condition shows how fully the Muntha delivers.

The annual ascendant and its lord

Mercury, lord of the annual ascendant, sits in the 2nd house of the annual chart. Read for this year: The 1st lord in your 2nd house: wealth, family and speech are central to your life. Your earning ability is good, family matters deeply to you, and your words carry weight, so use them kindly.

Mudda dasha: the year's planetary periods

Mudda dasha compresses the Vimshottari cycle into this one year, starting from the lord of the Moon's nakshatra in the annual chart. Each planet's stretch brings forward the houses it rules and occupies in the annual chart.

Ashtakavarga

Ashtakavarga counts the benefic points (bindus) that the seven planets and the ascendant give each sign. In the Sarvashtakavarga (the total), a sign with 28 or more points is strong: houses and transits there tend to go well. Fewer than 25 points needs more care.

Sarvashtakavarga (total)

Ari	Tau	Gem	Can	Leo	Vir	Lib	Sco	Sag	Cap	Aqu	Pis
29	33	34	31	19	26	21	31	33	23	27	30

Strongest signs for you: Gemini (34), Taurus (33), Sagittarius (33).

Signs that need more care: Leo (19), Libra (21), Capricorn (23).

Remedies for your chart

These are the planets that most need support in your chart right now, and why. For each: its beej mantra, the deity, the donation, the rudraksha and the conduct that tradition prescribes. Choose one or two that feel right and keep them up regularly; a small practice done faithfully works better than many done occasionally.

Saturn Shani

Why: lord of your running mahadasha; Sade Sati or Dhaiya is running.

BEEJ MANTRA

ॐ प्रां प्रीं प्रौं सः शनैश्चराय नमः ॥

Om Praam Preem Praum Sah Shanaishcharaya Namah

Chant 108 times (one mala) daily, or at least on Saturdays. A full traditional anushtan is 23,000 repetitions, about 213 malas, spread over 40 days.

Shani, or Saturn, is the planet of discipline, hard work, justice and delay. The Shani beej mantra is traditionally chanted for patience and perseverance, steady progress after delays, and relief during Sade Sati, Dhaiya or a difficult Shani mahadasha.

Saturday is its day, and evening is the traditional time. Many light a sesame-oil lamp under a peepal tree or at a Shani temple, wear black or dark blue, and also read the Hanuman Chalisa, since tradition holds that Shani does not trouble Hanuman's devotees.

Rudraksha: 7 mukhi
